Hundreds of libraries nationwide subscribe—and you'll want to, too.

If your patrons are like most, they love the internet for its immediacy. That goes double for investing information, which changes minute to minute.

But most financial databases are masses of complexity. Not only is the information dense, but simply navigating many of these monsters is a challenge.

That's why libraries across the nation are adopting Morningstar Investment Research Center. We designed it especially for busy librarians and their patrons. It's easy to use.

But just because it's easy to use doesn't mean it's stripped down. Your patrons will have access to the most comprehensive financial data on stocks and funds available anywhere.

Plus, they'll benefit from Morningstar's independence. That's an important consideration today, with much of the investment industry under fire for neglecting shareholder interests.

See why Morningstar Investment Research Center is showing up in libraries nationwide. Request a no-obligation demonstration or a free 30-day trial today.
